ECONOMY

OECD Marginally Raises India's GDP Growth Forecast

- The Organization for Economic Co-operation and Development (OECD) has marginally raised its 2023-24 (FY24) growth forecast for India to 6 per cent, from 5.9 per cent estimated earlier, while maintaining that “weak global demand and the effect of monetary policy tightening will constrain” growth in the world’s fifth-largest economy in the current fiscal year.
- Moderating inflation and monetary policy easing in the second half of 2024 will help discretionary household spending regain momentum.
- This, along with improved global conditions, will help economic activity to accelerate, with a growth of 7 per cent in real gross domestic product (GDP) in 2024-25
- Global GDP growth in 2023 is projected to be 2.7 per cent, the lowest annual rate since the global financial crisis, except for the 2020 pandemic period.
- The robust FY23 GDP data and encouraging signs of high-frequency indicators led to a spate of upward revisions in FY24 GDP growth forecasts by analysts.
